

Frida

frida版本: 12.8.0

Url:<https://github.com/frida/frida/releases/tag/12.8.0>

frida-server-12.8.0-android-arm64.xz

target:

1.系统时光机 (VMware + kali)

2.python全版本随意切 (pyenv)

3.frida (-tools) 全版本随意切

4.frida-serve自定义名称端口
(frida-tools、frida、rpc、objection)

5.Frida(rpc)多主机多手机多端口混连

命令行

```
pyenv install 3.8.2
```

```
pyenv local 3.8.2
```

```
python -V
```

```
pip -V
```

```
proxychains pip install frida-tools //安装最新版本frida 目前是12.8.20
```

```
frida -version
```

```
frida-ps --version
```

```
pyenv install 3.7.7
```

```
pyenv local 3.7.7
```

```
python -V
```

```
pip -V
```

```
proxychains pip install frida==12.8.0 //安装固定版本frida
```

```
proxychains pip install frida-tools==5.3.0 //安装固定版本frida-tools
```

```
frida -version
```

```
frida-ps --version
```

```
proxychains pip install objection //objection默认安装最新
```

```
objection --help
```

server:

```
mv frida-server fs
```

```
./fs -l 0.0.0.0:8888
```

client: //网络连接 非USB

```
frida-ps -H 192.168.0.119:8888 //frida-tools连接
```

```
frida -H 192.168.0.119:8888 -f com.android.settings //frida 连接
```

```
objection -N -h 192.168.0.119 -p 8888 -g com.android.settings explore //objection连接
```

rpc需要写代码:

下载frida-agent: <https://github.com/oleavr/frida-agent-example>

安装vscode

安装npm: <https://github.com/nodesource/distributions#deb>

```
curl -sL https://deb.nodesource.com/setup_10.x | sudo -E bash -
```

```
apt update
```

```
proxychains apt-get install -y nodejs
```

注意问题

下载安装python、frida时用代理, 不然一来下载速度慢, 二来容易报错

待解决问题

frida(rpc)多主机多手机多端口混连 R姐这个太...暂时没得手机, 玩不了玩不了

实现RPC代码门外汉模式-->争取早日进门
